DETAILED ACTION

Drawings

The corrected or substitute drawings were received on 6/20/03. These drawings are accepted.

Allowable Subject Matter

Claims 25-48, 60-63, and 76-99 are allowed.

The following is an examiner's statement of reasons for allowance:

In reference to claims 25-48, 60-63, and 79-87, while Auvert, as applied above, does teach many of the elements of these claims, as well as providing for different atmospheric conditions between the closed vessel and the chamber, the chamber of Auvert is supplied with reactive, not inert gas, as is specified in these claims.

Referring to claims 76-78, the structure of a moveable displacement adjusting member couple to a surface plate supporting a lens barrel, in conjunction with the other subject matter of these claims, is not found in the prior art.

Regarding claims 94-99, an exposure apparatus including a supporting member coupled to a closed vessel via a bellows, along with the rest of the structure and function of these claims, is not taught in the prior art.

Further, referring to claims 88-93, an exposure apparatus including a deformable member, as particularly defined, with the remaining limitation recited in these claims, is not suggested by the prior art.
